

## TREMITI BEACH

TYPE OF LEATHER: Calfskin

TECHNIQUE: Aniline or semi-aniline drum dyed and hand woven

DIRECTION: Leather strips run horizontally

STRIP WIDTH: 10 mm with 2mm jute cord

THICKNESS: 2.2 / 2.6 mm

SIZE: Panels are woven to required size, without width or height limitation.

CUSTOM COLOR: Available upon request

IDEAL FOR: Walls, headboards, drawer fronts

We will alter the finish of this leather according to your application,  
using semi-aniline leather where higher performance is required.

Full aniline leather will develop a gentle patina, over time.
